

The diagram illustrates a system architecture for a manufacturer-created PC at a customer location. It features three main components: a software source (100), a BIOS source (120), and a device drivers source (130), all connected to a central PC unit (110).

- 100**: A floppy disk icon labeled "After-Sale Manuf. Provided Software". An arrow points from this disk to the top of the PC tower.
- 120**: A circle labeled "Manufacturer Created / Modified BIOS". An arrow points from this circle to the side of the PC tower.
- 130**: A circle labeled "Manufacturer Created / Modified Device Drivers". An arrow points from this circle to the side of the PC tower.
- 110**: A desktop PC system consisting of a tower and a monitor, labeled "Manufacturer Created PC at Customer Location".

```
graph TD; 100[100: After-Sale Manuf. Provided Software] --> 110[110: Manufacturer Created PC at Customer Location]; 120((120: Manufacturer Created / Modified BIOS)) --> 110; 130((130: Manufacturer Created / Modified Device Drivers)) --> 110;
```
